## PROJECT SUMMARY SHEET FOR MULTI-FAMILY PROJECTS

**INSTRUCTIONS:** Complete this Project Cover Sheet and the forms contained in this bundle will auto-populate. The Project Cover Sheet does not contain all the fields needed to completely populate forms. Review the forms, provide missing data. Forms not contained in the bundle can be downloaded from the CAA Portal.

Electrician
Other (describe)

**Column B:** Enter the total number of new hires for each category of workers identified in Column A in connection with the project. New hires refer to persons not on the contractor's payroll for employment prior to the commencement of the project identified on this Section 3 Report.

**Column C:** Enter the number of Section 3 new hires for each category of workers identified in Column A in connection with the project. New hires refer to persons not on the contractor's payroll for employment prior to the commencement of the project identified on this Section 3 Report.

Column D: Enter the percentage of the total staff hours of new hires in connection with this project.

**Column E:** Enter the percentage of the total staff hours worked for employees and trainees (including new hires) connected with this project. Include staff hours for part-time and full-time.

Column F: Enter the number of Section 3 residents that were trained in connection with this project.

### **Contractor Pollution Occurrence Insurance Incentive Pilot Program**

INSTRUCTIONS: Contractors must complete this Contractor Pollution Occurrence Insurance Incentive Pilot Program (CPOII Pilot Program) section to receive a \$500 incentive payment to supplement Pollution Occurrence insurance premiums currently being paid by the Contractor who performed lead hazard reduction and/or abatement services funded through HUD's Lead Hazard Reduction Grant. The maximum annual award is \$2,000 per contractor. MaineHousing will calculate and remit payment directly to Contractors. Contractors who have reached the maximum benefit amount of \$2,000 during the current calendar year of the pilot program will not be eligible for an incentive payment until January 1 of the following calendar year. The CPOII Pilot Program period is February 3, 2020 through August 3, 2023. ☐ I wish to participate in the CPOII Pilot Program. I certify the following (check all that apply): ☐ Project started within seven (7) days from the effective start date indicated on the signed Construction Contract Project completed by the end date referenced on the signed Construction Contract  $\square$  Units cleared on the first test. ☐ I have satisfactorily completed the necessary work to justify this request. ☐ Attached is my company's current and active Pollution Occurrence Insurance Certificate. ☐ I do not wish to participate in the CPOII Pilot Program. #### LEAD PAINT PLUS ESSENTIAL MAINTENANCE PLAN

Project Funding:	State Lead (Z267)	State Lead (N261)	Federal Lead	Healthy Homes	Healthy Homes Production	DHHS
Agency (CAA):				CAA Rep Name:		
				CAA Rep Title:		
	_	_		CAA Rep Phone:		
Project Typ	e: Single-Family	☐ Multi-Family		CAA Rep Email:		
				_		
Applicant (Ow	ner):		Co-A	pplicant:		
Property:			Cont	ractor:		
Unit #:			Inspe	ection Date:		
RESIDENT	IAL UNIT:					

#### A. <u>Overview</u>

Paint Plus Essential Maintenance Plan ("Paint Plus") is an interim (short-term) method used by lead contractors and property owners to temporarily eliminate lead hazards. Interim controls are achieved through the removal of any chipping, cracking, and flaking paint plus the application of a new protective coating of paint in conjunction with the implementation of a written essential maintenance plan. This method cannot be used on impact or friction surfaces (e.g. floors, stair treads/risers, thresh holds, window sashes, parting beads, stops, window wells, doorjambs and edges).

#### B. <u>Essential Maintenance Plan</u>

An Essential Maintenance Plan is a written and implemented plan of paint inspection and maintenance that ensures that the paint remains in good condition and that the surface is not creating a lead hazard. The building owner must carry out Essential Maintenance Practices six months from the initial application of the paint and annually thereafter, whenever occupancy changes and immediately after the occurrence of unexpected events which cause deterioration of the painted surfaces.

Enclosed you will find an inventory of the building components that you will need to inspect and several forms that will assist you in documenting your Essential Maintenance Plan-related activities. Also enclosed you will find the "Essential Maintenance for a Lead-Safe Home" brochure. Please make sure you read this brochure; it provides information you need to implement Essential Maintenance Practices.

## C. <u>Elements of the Essential Maintenance Plan</u>

The Essential Maintenance Plan has 4 parts: an inventory of painted surfaces that need routine inspection and maintenance; a schedule and protocol for routine visual inspections; forms for documenting routine inspections and essential maintenance performed; and the booklet "Essential Maintenance for a Lead-Safe Home" that describes how to perform essential maintenance.

#### D. "Paint Plus" Building Component Inventory

The "Paint Plus" Building Component Inventory Form contains a list of all building components within your dwelling unit where paint plus essential maintenance practices was used by the contractor. It is organized first by Room Name, and then lists Building Component and Location in the Room. These are the specific building components that must be visually inspected and properly maintained.

E. Scheduled Visual Inspections of Building Components  Each of the building components listed on the "Paint Plus" Building Component Inventory Form must be visually inspected six months from the initial application of the paint and annually thereafter, whenever occupancy changes and immediately after the occurrence of unexpected events which cause deterioration of the painted surfaces. You must do this visual inspection to document that the condition of the paint remains intact.  F. How to do a visual inspection  When performing your inspection, check each building component for signs of:  (1) Flaking paint (2) Peeling paint (3) Cracking paint (4) Paint chips (5) Dust on window sills (6) Dust on the floor  If the building component is damaged and/or needs repair, follow the Safe Work Practices referred to in the enclosed brochure, "Essential Maintenance for a Lead-Safe Home".  G. What to do after your visual inspection  After completing the routine visual inspection, fill in the enclosed form, "Visual Inspection Form" to document that you have done your visual inspection(s). Save this form with your Essential Maintenance Practices Plan.  H. Documenting Essential Maintenance Practices Plan Requirements  Included are forms used to record your Essential Maintenance Practice-related activities. It includes a signature sheet that is to be used to document that you have read and understand the Essential Maintenance Practices Plan requirements.  I. Forms/Signature Sheet  (1) Understanding the Requirements of the Essential Maintenance Practices Plan Signature Sheet;  (2) Paint-Plus Building Component Inventory Form;  (3) Visual Inspection Form; and  (4) Essential Maintenance for a Lead-Safe Home brochure.  Understanding the Requirements of the Essential Maintenance Practices Plan, and agree to maintain this facility in accordance with the developed Essential Maintenance Practices Plan. #### A. <u>Overview</u>

Paint Plus Essential Maintenance Plan ("Paint Plus") is an interim (short-term) method used by lead contractors and property owners to temporarily eliminate lead hazards. Interim controls are achieved through the removal of any chipping, cracking, and flaking paint plus the application of a new protective coating of paint in conjunction with the implementation of a written essential maintenance plan. This method cannot be used on impact or friction surfaces (e.g. floors, stair treads/risers, thresh holds, window sashes, parting beads, stops, window wells, doorjambs and edges).

#### B. <u>Essential Maintenance Plan</u>

An Essential Maintenance Plan is a written and implemented plan of paint inspection and maintenance that ensures that the paint remains in good condition and that the surface is not creating a lead hazard. The building owner must carry out Essential Maintenance Practices six months from the initial application of the paint and annually thereafter, whenever occupancy changes and immediately after the occurrence of unexpected events which cause deterioration of the painted surfaces.

Enclosed you will find an inventory of the building components that you will need to inspect and several forms that will assist you in documenting your Essential Maintenance Plan-related activities. Also enclosed you will find the "Essential Maintenance for a Lead-Safe Home" brochure. Please make sure you read this brochure; it provides information you need to implement Essential Maintenance Practices.

### C. Elements of the Essential Maintenance Plan

The Essential Maintenance Plan has 4 parts: an inventory of painted surfaces that need routine inspection and maintenance; a schedule and protocol for routine visual inspections; forms for documenting routine inspections and essential maintenance performed; and the booklet "Essential Maintenance for a Lead-Safe Home" that describes how to perform essential maintenance.

#### D. "Paint Plus" Building Component Inventory

The "Paint Plus" Building Component Inventory Form contains a list of all building components within your dwelling unit where paint plus essential maintenance practices was used by the contractor. It is organized first by Room Name, and then lists Building Component and Location in the Room. These are the specific building components that must be visually inspected and properly maintained.

### **BUILDING COMPONENT INVENTORY FORM**

The following listing shows the type and location of those building components where Paint Plus Essential Maintenance Practices was used as a lead hazard control method by a lead abatement contractor to eliminate lead hazards. These are the specific building components that must be visually inspected and properly maintained to prevent lead hazards from redeveloping.
